

KOLB STUDIO EVOLUTION

Kolb Studio was strategically located at the head of Bright Angel Trail on one of Ralph Cameron's mining claims. As part of their agreement with Cameron, the Kolb brothers collected a toll from anyone who used the trail to access the inner canyon.

Kolb Studio grew over time to accommodate the needs of a growing business and family. From its humble beginnings in 1904 it has evolved to its current size of 6,000 square feet on five stories cascading down the canyon rim. As interior and exterior changed, one thing remained the same: the 1904 entry, which is the door to your immediate right. DIAGRAMS COURTESY NPS
